Project Name	Smart Lender – Loan Approval Prediction System
Maximum Marks	2 Marks

Data Flow Diagram

The Data Flow Diagram (DFD) illustrates how data moves through the Smart Lender – Loan Approval Prediction System. It shows the interaction between the loan applicant, the Smart Lender application, the trained machine learning model, and the prediction result. The DFD helps visualize the flow of information from user input to loan approval prediction, making the system easier to understand and analyze.

DFD Symbol Legend :-

Symbol	Name	Description
Oval / Rounded shape	External Entity	User who submits loan details and receives the prediction.
Rectangle with numbered header	Process	Includes Enter Loan Details, Validate Input, and Predict Loan Status.
Rectangle (solid fill, no number)	Trained ML Model (smart_lender_model.pkl)	Stores the trained Random Forest model used for prediction
Labeled arrow	Data Flow	Represents the flow of Loan Details, Validated Data, Prediction Request, and Prediction Result between the applicant, processes, and model.
