

Code-Layout, Readability and Reusability

Date	27 June 2026
Team ID	
Project Name	Smart Lender – Loan Approval Prediction System
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the Smart Lender project's code quality based on its layout, readability, and reusability. A well-structured codebase improves maintenance, simplifies debugging, and supports future enhancements.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout	Yes	Uniform indentation throughout the project.
2	Proper File Structure	Files and folders are logically organize	Yes	Organized into templates, static, model, and application files.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Clear and descriptive variable names used.
4	Function / Method Names	Functions are descriptively named	Yes	Functions are named based on their purpose.
5	Code Comments	Inline and block comments explain log	Partial	Comments added for important sections only
6	Modular Design	Code is split into reusable functions/m	Yes	Prediction logic separated from the user interface.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Unused and duplicate code removed.
8	Error Handling	Exceptions and errors are handled gra	Partial	Basic input validation implemented.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	where Reused	Reusability Level (High / Medium / Low)
1	Flask Application	Python, Flask	Request handling	High
2	Random Forest Model	Scikit-learn	Loan prediction	High
3	HTML Templates	HTML	User interface	High
4	CSS Stylesheet	CSS	Web pages	High
5	Prediction Function	Python	Model inference	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well organized and easy to maintain.
Readability	5	Clear naming and simple logic.
Reusability	4	components can be reused with minor modifications.
Documentation / Comments	4	Important sections are documented.
Overall Score	4.5/5	Clean, maintainable, and reusable codebase.

Overall Description :-

The Smart Lender – Loan Approval Prediction System follows good coding practices by maintaining a clear file structure, meaningful naming conventions, and modular design. The Flask application, machine learning model, and user interface components are organized for easy maintenance and future enhancements. The code is readable, reusable, and efficient, making the application reliable for both development and deployment while supporting future improvements with minimal changes.
