

Demonstration of Proposed Features

Date	29 June 2026
Team ID	
Project Name	Smart Lender – Loan Approval Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Loan Eligibility Prediction	Predicts loan approval using applicant information and a trained machine learning model.	Implemented	Yes	Core functionality completed successfully.
2	User-Friendly Web Interface	Developed a responsive interface using HTML and CSS for easy data entry.	Implemented	Yes	Simple and easy to use
3	Multiple Model Evaluation	Implemented Decision Tree, Random Forest, KNN, and XGBoost models for comparison.	Implemented	Yes	Random Forest selected as the final model.
4	Flask Integration	Integrated the trained Random Forest model with the Flask backend for real-time predictions.	Implemented	Yes	Successfully connected frontend and backend.
5	Cloud Deployment	Deployed the application on the Render cloud platform for online accessibility	Implemented	Yes	Live application tested successfully
6	GitHub Version Control	Uploaded and maintained the complete project using Git and GitHub.	Implemented	Yes	Repository contains all project files and documentation.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
