

Project Demo Planning

Date	29 June 2026
Team ID	
Project Name	Smart Lender – Loan Approval Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project objective, problem statement, and project scope.	2	Ragutu Navya Venkata Teja
2	Solution Overview	Explain the system architecture, workflow, machine learning models, and technology stack.	3	Ragutu Navya Venkata Teja
3	Model Development	Briefly describe data preprocessing, model training, model comparison, and Random Forest model selection.	3	Ragutu Navya Venkata Teja
4	Live Application Demonstration	Demonstrate the Flask web application by entering applicant details and generating loan approval predictions.	5	Ragutu Navya Venkata Teja
5	GitHub & Render Deployment	Present the GitHub repository, project files, and live application deployed on Render.	2	Ragutu Navya Venkata Teja
6	Project Summary	Summarize the project outcomes, future enhancements, and conclude the demonstration.	2	Ragutu Navya Venkata Teja

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the challenges of manual loan approval and the objective of the Smart Lender system.
2	Solution Overview	Describe the project workflow, architecture, technologies used, and the selected Random Forest model.
3	Live Feature Demonstration	Show the Flask application, enter applicant details, and demonstrate real-time loan approval prediction.
4	Q&A Session	Answer questions related to machine learning models, application development, GitHub repository, and Render deployment.
